Notes
2016
Canopy class difficult to determine
poor condition... dying?
partly uprooted
just barely tall enough to be co-dominant

2016
deaad
dead
lower branches dead

Plot 4a-2c White Oak control. Rectangular plot established in 1931, size is 4112 square feet approx. 66 feet by 66 feet).

Latitude- 41 24 09.19121 N

Longitude- 74 01 10.11858 W

Tree number- unique number assigned to each tree and painted on bark

Species- RO (red oak, *Quercus rubra*), CO (chestnut oak, *Quercus prinus*), SO (scarlet oak, *Quercus coccinea*), BO (black oak, *Quercus velutina*),

Coordinates- measured in feet from plot corner

Ingrowthyr- year when ingrowth was first recorded

Censinyr- left censored yr (present in plot when first sampled)

Deathyr- year when death was first recorded

Censoryr- right censoring (e.g., cut down)

Diameter at breast height- trunk diameter in inches rounded to the nearest tenth. Measured with diameter tape at painted line on all live trees 0.5 inch

Height- vertical distance in feet from ground to live top as measured with clinometer or laser rangefinder

Canopy class- d= dominant, c= codominant, i= intermediate, s= suppressed (or overtapped)
