Note:

Three deer taken were of special interest as possible aberrations. Two bucks displaying obvious appearance of being 2 ½ years of age, proved to be of yearling age. Both showing adequate weight, beam diameter and antler development to be 2 ½ years of age. The antlers had matured from the yearling stage of beam placement and angle from skull to that of a more pronounced angle and basal furrowing of a 2 ½ year old. The usual flattening of furrows during rutting behavior was absent. Upon investigating the deer's age by the tooth replacement and wear method it was determined that no dentine line existed on replaced pre-molars and the third molar. Also the top last molars were not fully erupted, classifying the two deer as yearlings. They were both given the age of 1 year 8 months.

A third buck was harvested, thought to be a large doe. This deer had already shed his antlers (Dec. 9th). The buck weighted 140 lbs (184 live) and was 3 ½ years of age. It was accompanied by a group of antlerless deer of more than six.

	Point Class	Beam Diameter	<u>Weight</u>	<u>Age</u>
Male	6 Points	17 mm	92 lbs.	1 yr. 8 months
Male	SPK	16 mm	110 lbs.	1 yr. 8 months
Male	Antlers Dropped		140 lbs.	3 ½ yrs.

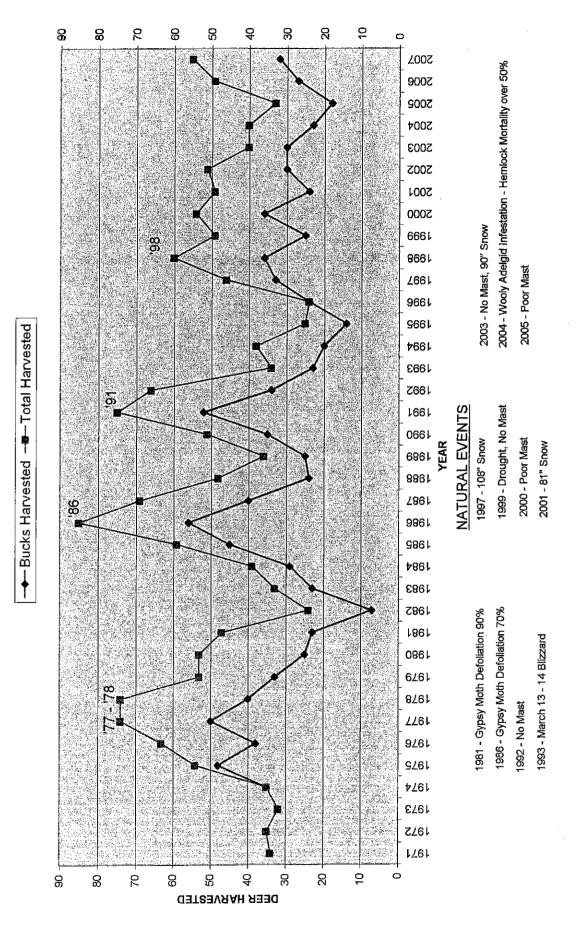

Sanctuary

As of Dec. 7, two days before the end of the season it was decided to open the 220 acre sanctuary to harvest antlerless deer. Previous to Dec. 7th the antlerless take had been 15, below the anticipated harvest. Of the 140 hunters who visited the forest (489 times), 70 possessed 3P management permits and 20 DMAP's were available at the deer station. Hunter's reported seeing deer, but antlerless harvest was inexplicably low. As a management decision, the sanctuary was open to supplement the antlerless take. Nine deer were harvested and up to twenty more were seen. The obvious explanation of this high concentration of deer in the center of the forest, surrounded by hunted zones, leads to believe that these deer have been herded by hunters, to a safe haven. In the past, since the sanctuary's beginnings (1988), tracking during winter months did not indicate an unusual increase of deer density in the sanctuary compared to the remaining hunted forest.

The creation of the sanctuary was reasoned to give yearling bucks a chance to survive hunting seasons, thus creating a healthier social and age structure of the deer herd. Harvest data previous to 1988 indicated very high hunting pressure. The previous 10 year yearling harvest was continually over 70% of the total buck harvest. After the posting of the deer sanctuary the yearling buck harvest has steadily been 50%. In recent years hunting pressure has decreased, not only at BRF but State Wide. This has put in question the purpose of the deer sanctuary.

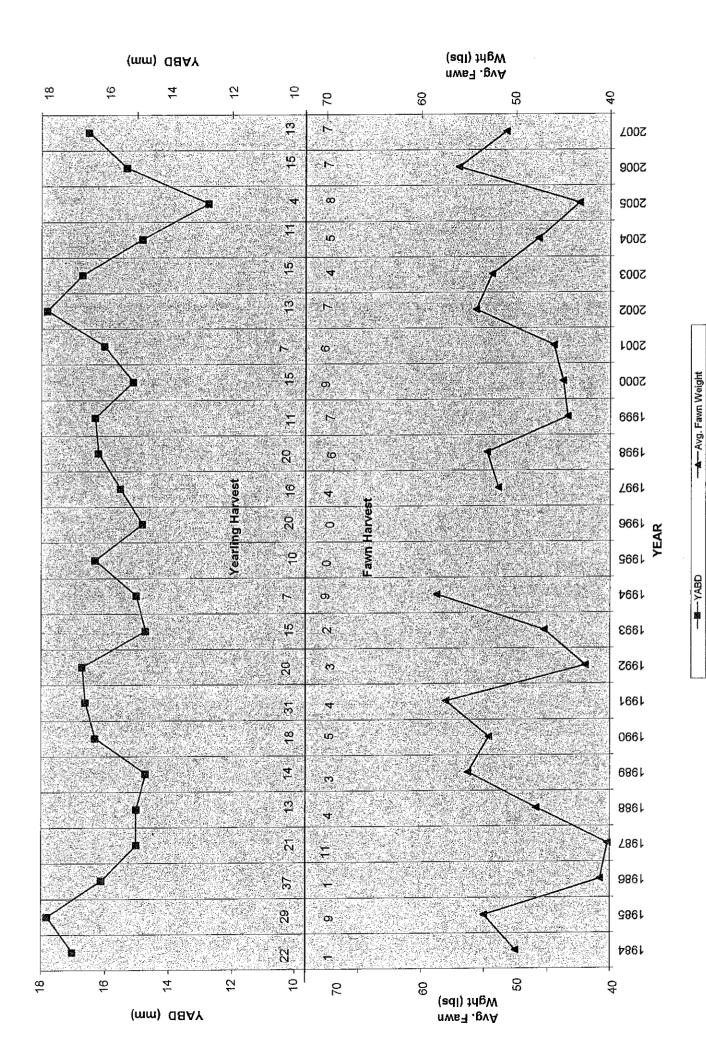

Time will determine if the 2007 harvest in the sanctuary was an aberration. For the present, this zone will be used as antierless hunting only during the last weekend of the season or as seen fit for the health of the herd and forest.

LAND AREA / LOCATION INFORMATION: (Required)

Either the Farm Service Agency or Tax Map ID Number of the property must be included on the completed application. Only the lands identified on the application will be valid for DMAP permit use.

REASON FOR DMAP:

<u>If Agricultural Damage</u>: Please complete the sections relating to the problem, methods used in the past and current status.

RECENT HUNTING AND DEER TAKE:

Complete this section based on your best recollection if a written record is not available.

HUNTER NEEDS/INTEREST:

If you wish to have your name made available to hunters or would like the names of interested hunters, complete this section.

<u>Number of DMAP Tags Requested</u>: No limit for agricultural, significant natural communities or municipal damage applicants (consider the number of hunters available). One tag per 50 acres for forest management and custom management applicants, except at the discretion of the Regional Wildlife Manager.

Indicate how many tags you are requesting up to the 1/50 threshold or explain why you need more. Only 2 tags may be used per hunter per year statewide, unless provided otherwise by the permit conditions.

MULTIPLE LANDOWNER INFORMATION:

If the land indicated on the application is held by more than one owner, each landowner must complete and sign this section. An applicant who leases lands must include the landowner information and signatures for those parcels. Additional sheets may be attached.

- (1) Persons applying under the agricultural category who have separated parcels and who wish to have more than one agent administering DMAP on those separate parcels, should submit a separate application for each.
- (2) Persons applying under the agricultural category may include lands adjacent to and contiguous with the lands on which the damage is occurring. Each additional landowner must complete and sign this section.
- (3) Forest owners with a qualifying management plan but less than 100 acres may meet the minimum requirement by including lands adjacent to and contiguous with their property. Adjacent lands included do not need a forest management plan. Parcels of less than 100 acres may also be considered, if enrolled in the Real Property Tax Law Section 480a program. Each additional landowner must complete and sign this section.

REMEMBER TO SIGN AND DATE THE APPLICATION!

New York State Department of Environmental Conservation Division of Fish, Wildlife and Marine Resources

DMAP APPLICATION INSTRUCTIONS

Postmark Deadline - September 1

The Deer Management Assistance Program (DMAP) offers landowners and land managers opportunities to improve deer management on the lands they own or control. In order to enroll in the program, the applicant must submit a **complete** application by **September 1**. Please use the following instructions to help ensure your application is complete, and ready for processing by Department Wildlife Managers.

APPLICANT INFORMATION: (Required)

<u>New or Renewal</u>: Indicate by checking the appropriate box whether this is a new (first time) application, a renewal of last years with no changes or a renewal of last years with changes in the area included. If you applied last year and were denied a permit, consider this a new application. Applications may be rejected based on failure to report the results of previous DMAP permits in a timely manner.

<u>Name</u>: In the first "Name" block, indicate the name of the landowner, club, cooperative or municipality that is seeking a DMAP permit. In the second "Name" block, indicate the name of the person (if different) who will be responsible for administering the DMAP permit on site. All correspondence will be sent to this individual. Additional landowners/properties may be included on the reverse side of the application.

APPLICATION CATEGORY: (Required)

Check the appropriate box.

Agricultural: Lands on which a crop is being damaged, including Christmas trees and nurseries. To qualify, damage must be documented by the Department. Deer damage that has been documented in the past three years will be considered ongoing. Un-documented damage will be verified by the Department as time permits. For multiple parcels which are separated, see "(1)" under the Multiple Landowner Information section of these instructions. Lands adjacent to areas with agricultural damage may also be included. See "(2)" under the Multiple Landowner Information section of these instructions.

Municipality*: An incorporated town, village or city that has a documented deer problem and a Department approved plan for deer management.

<u>Significant Natural Communities</u>*: Lands on which deer damage to significant natural communities has or can be documented by the Department or described within the New York Natural Heritage Program's Biological and Conservation Database. Such damage must be identified in an existing land management plan for the property.

<u>Forest Regeneration</u>*: Lands of at least 100 contiguous acres in one or more parcels on which deer are negatively impacting forest regeneration. Such impact must be documented in an existing forest management plan for the property. Two or more landowners may combine forest acreage to meet the minimum size requirement. See "(3)" under the <u>Multiple Landowner Information</u> section of these instructions.

<u>Custom Deer Management</u>*: Lands of at least 1000 contiguous acres on which a deer management plan has been established for improved deer herd management. Custom deer management includes strategies such as quality deer management (QDM), trophy management, and other programs which attempt to balance age structure, sex ratios and forage availability.

*Management Plan Required: For municipal, significant natural communities, and forest regeneration an existing plan should identify the deer problem. For custom deer management, a plan which clearly describes the management goals and how progress will be evaluated is required. The Regional Department Wildlife Manager can provide a management plan outline to applicants to help them meet this requirement.

New York State Department of Environmental Construction Division of Fish, Wildlife and Marine Resources, Region 3

21 South Putt Corners Road New Paltz, NY 12561-1620 Phone: (845) 256-3094

Fax: (845) 255-4659

website: www.dec.state.nv.us

Dear DMAP participant:

Enclosed you will find your allocation of 2007 DMAP carcass tags and report cards. It is important that you (the permit holder) fill in (1) the permit holder and telephone information on the antlerless deer tag (middle section) and (2) the name of applicant on the carcass tag (bottom section). Successful hunters are required to fill out the carcass tag and deer report card and mail the report card within 48 hours of the date of kill.

A maximum of 2 permits are to be issued to each hunter for the property covered by the permit. Deer Harvest Summary Reports are to be filled out and mailed to the issuing office (above address) within 5 days of the close of the big game season. It is your responsibility to ensure that all harvests are reported to you and that harvest summaries are returned on time. Failure to return harvest summaries may result in denial of future DMAP applications.

Sincerely,

Kevin Clarke

Regional Deer Biologist

17 OUT OF 20 Success

New York State Department of Environmental Conservation Division of Fish, Wildlife and Marine Resources

Region 3 Wildlife Office 21 South Putt Corners Road New Paltz, NY 12561-1696 (845) 256-3098

2007 DEER MANAGEMENT ASSISTANCE PROGRAM (DMAP)

Permit ID: 306-103

Agent: JOHN

BRADY

Permittee:

87 WOODCOCK MTN RD WASHINGTONVILL, NY 10992 BLACK ROCK FOREST CONSORTIUM .

129 CONTINENTAL RD CORNWALL NY 12518

Enclosed are 20 carcass tags for use on the properties of the Permittee listed above in the county of **ORANGE** and the town of **CORNWALL**

Your application for participation in the 2006 Deer Management Assistance Program (DMAP) has been approved. The Agent listed above is responsible for the issuance of carcass tags, as well as completion and submission of the summary report.

CONDITIONS

The following provisions apply for use of DMAP tags on your property:

- 1) All laws and regulations pertaining to season dates, hunting hours, tagging requirements, and transportation and possession of game remain in effect.
- 2) DMAP tags may be used in any open season with the appropriate legal hunting implement.
- 3) DMAP tags are valid only on the lands specified. Possession afield on lands other than those listed on the application is prohibited.
- 4) DMAP tags are valid for antierless deer only (having antiers measuring less than 3 inches).
- 5) No more than 2 DMAP tags may be used per hunter per license year.
- 6) All hunters utilizing DMAP tags must also possess a valid big game license and appropriate season license for the season in which the tag(s) are being used.
- 7) DMAP tags may not be sold.
- 8) DMAP tags may not be transferred except by permittee or the permit agent.
- 9) Each hunter must mail in the completed Report Card and report the harvested deer information to you if they are successful.
- 10) The enclosed Deer Harvest Summary must be submitted to the issuing office (see above address) no later than 5 days after the closing of the big game hunting season for that license year.
- 11) Failure to comply with any conditions of the DMAP permit and/or violations of the Environmental Conservation Law may result in revocation of DMAP permit and/or denial of future DMAP
